

CROWN POINT
By
PAUL SAWYIER (1865-1917)

This original Paul Sawyer watercolor is truly unique because it is the only Sawyer found to date that shows Frankfort from a hilltop to the west. Included in the scene are several steeples, the Arsenal, and on the distant hill the Frankfort Cemetery.

Sawyer created this scene while standing in the field of a farm that offered a vista of Frankfort. The land is now fully developed, offering residents on Crown Point Drive their own spectacular view of the Capital city.

This original would have been created about 1900. It came into the possession of a Frankfort antique dealer in the early 1900's and until recently, remained with the family. This painting has been restored to its original beauty.
